In partnership with the pharma industry

EUROPEAN REVIEW PHARMACEUTICAL

IN THIS ISSUE

Navigating roadblocks to clinical success: decision-making from molecule to clinic

Raman spectroscopy for the qualitative analysis of falsified and substandard medicines

Overview of risk assessments for elemental impurities: implementation of ICH Q3D guidelines

Formulation, Development & Delivery

This In-Depth Focus examines the use of real-time PCR to detect Staphylococcus aureus in pharmaceutical products contaminated with mixed bacterial cultures

The challenges of shipping temperature-controlled products from origin to destination

Online drying process control of pharmaceutical intermediates using near-infrared spectroscopy

The potential use of blockchain technologies to meet data-sharing requirements of the DSCSA

Pharmaceutical packaging

Child resistant, easy opening, sustainable: the standards that govern safe packaging

ANALYTICAL TECHNIQUES

BIOPHARMA

DRUG DELIVERY
